

Feel and look your best with VASER Lipo, an ultrasonic technology that can target specific areas of your body to remove unwanted fat deposits and give you the overall proportion you desire. An alternative to the techniques of traditional liposuction that require weeks of recovery, patients experience far less discomfort and can return to work in 3 to 5 days. VASER Lipo is tissue-selective, meaning it can specifically target fat deposits, while protecting nerves, blood vessels, and connective tissues from damage. As a result, patients experience minimal pain and bruising and a quick return to normal activities.

How does VASER Lipo differ from traditional liposuction?

VASER Lipo uses state-of-the-art ultrasound technology designed to gently reshape your body. With VASER Lipo, the patient receives local anesthesia to the treatment area and is not unconscious. This provides for faster recovery times and overall safety. Normally, patients experience mild discomfort and pressure during the procedure.

How soon will I see my results?

What is the recovery time?

This varies with the extensiveness of the procedure which involves the amount of fat removed and the number of areas treated. In most cases, patients resume work within 3-5 days! Results begin immediately after the procedure with continuing improvement until the final result 3 to 4 months later. Our physicians can help you establish realistic expectations for your results and recovery time.

How much does the treatment cost?

VASER Lipo is an advanced procedure, and it is impossible to provide an accurate estimate for your procedure without a free, in-person consultation. The total cost of your treatment will vary depending upon the number of areas treated and the extensiveness of the procedure. We work with CareCredit which offers 6 months interest-free financing on approved credit. www.carecredit.com

With VASER Lipo, you can expect:

- ☞ Realistic curves and definition, even for hard-to-fix spots
- ☞ Easy removal of large quantities of fat
- ☞ Precise sculpting of delicate areas of the body
- ☞ Minimally invasive procedures that can be delivered in a comfortable, clinical setting
- ☞ Fast recovery times
- ☞ Smooth, tight results

Lipo treatment includes pre & post Body Sculpting treatments.

Body Sculpting & Facial Rejuvenation

NON-SURGICAL
AESTHETIC
REDUCTION

Refined Skin Medi-Spa offers an exclusive non-invasive treatment combination for skin rejuvenation and cellulite reduction. Experience the transforming effects of body sculpting with DermaWave and MedSculpt, non-surgical treatments for cellulite, fat and wrinkles. We offer you an alternative to surgery with minimal discomfort and little or no downtime.

Both FDA approved, European DermaWave No-Needle Mesotherapy™ and MedSculpt™ devices represent the latest advancement in computerized, non-invasive, body and facial contouring technology.

DermaWave No-Needle Mesotherapy™ uses specially designed pulses of electrical energy and laser beams to relieve congested tissue. The treatment is based on a technique called Aquaphoresis™ which uses specialized electrical waveforms to help reactivate specific physiological processes in tissue that contribute to the formation of cellulite.

MedSculpt™ combines micro massage with ultrasound technology, directly targeting the compacted layer of cells. The intense mechanical massage of the tissues stimulates the arterial, venous and lymphatic circulation. Ultrasound is used in conjunction with the massage to ensure deeper action on the treated tissue, improving the reabsorption of stasis liquid as well as a redistribution and reduction of the subcutaneous fat.

Body sculpting treatments offer patients toned, smoother and healthier tissue, as well as a reduction in the circumference and general remodeling of the entire area treated.

Facial rejuvenation uses electrical stimulation and aquaphoresis to help deliver a specially formulated, highly antioxidant gel past the semipermeable barrier of your skin to aid in cell repair and rejuvenation.

Body Sculpting \$200 per treatment

Facial Rejuvenation \$175 per treatment
